

Game Design Report

Mason Buckle

registration: 100428908

Contents

1. Summary	3
1.1. Synopsis	3
1.2. Target Audience	4
1.3. Game Experience	5
1.4. MoSCoW	6
2. Background	7
2.1. Risk Of Rain 2	7
2.2. Megabonk	7
3. Specification	8
3.1. Story	9
3.2. Game aesthetics	9
3.3. Game content	9
3.4. Game mechanics	9
3.5. Game technology	9
4. Prototype	10
5. Conclusion	11
References	12
A. Appendix	13
A.1. System Architecture	13
A.2. Original Objectives	14
B. Gantt chart	15

1. Summary

1.1. Synopsis

1.2. Target Audience

1.3. Game Experience

1.4. MoSCoW

2. Background

2.1. Risk Of Rain 2

See Figure 1 in the appendix. This game is roguelike, third person shooter created by Hopoo Games.

2.2. Megabonk

3. Specification

3.1. Story

3.2. Game aesthetics

3.3. Game content

3.4. Game mechanics

3.5. Game technology

4. Prototype

5. Conclusion

References

A. Appendix

A.1. System Architecture

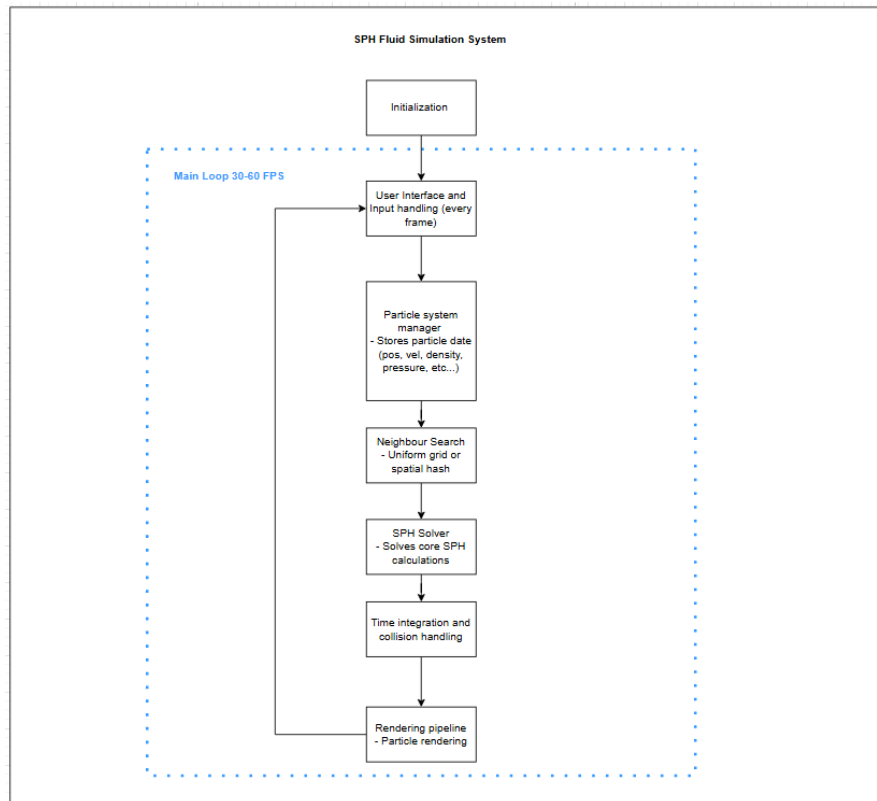

Figure 1: SPH Fluid Simulation System Architecture Diagram

This diagram illustrates the overall system architecture showing the initialization phase and the main simulation loop

A.2. Original Objectives

1. Project Proposal (Weeks 1-2): Draft a project proposal, receive feedback and update accordingly.
2. Literature review (Weeks 2-6): Write up a literature review on the project comparing different methodologies and literature. Decide on what methodology to use.
3. Design (Week 6-8): Look over the core algorithms and chosen method to deepen understanding
4. Coding (Week 8-22): Code and implement the fluid simulation
5. Testing and evaluation (8-26): Generally testing as code base develops and once done run evaluation testing
6. Final report and project submission (Week 26-34): Write up final report and submit project

B. Gantt chart

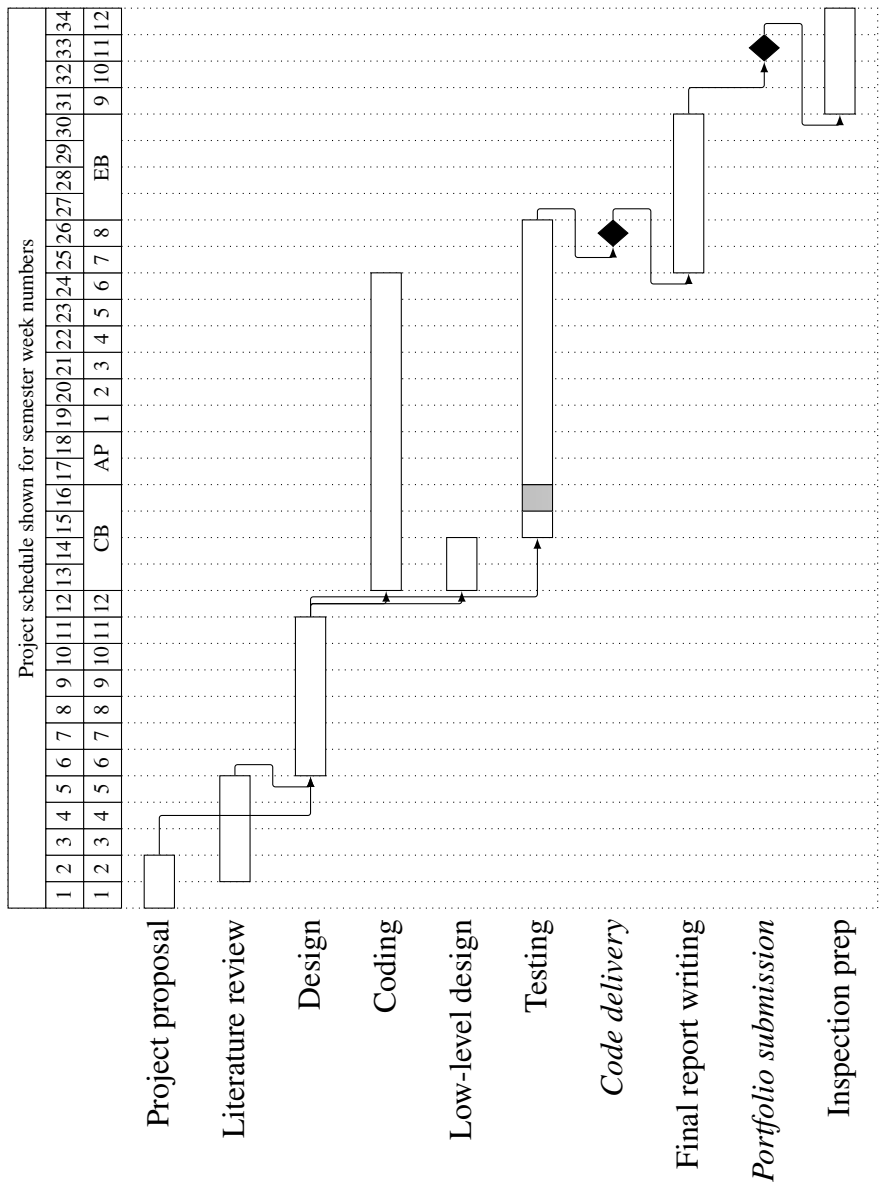

Figure 2: Project Gantt chart
